Contents

Volume 61 Number 1

	v	PUBLISHER'S ANNOUNCEMENT
AUTHORS		ARTICLES
S A Aly, N Z El Sayed and M A Kaid	1	Effect of annealing on the optical properties of thermally evaporated ZnO films
M A Afifi, A E Bekheet, E Abd Elwahhab and H E Atyia	9	Ac conductivity and dielectric properties of amorphous In_2Se_3 films
A K Ray, J Exley, Z Ghassemlooy, D Crowther, M T Ahmet and J Silver	19	Optical absorption in metal bisphthalocyanine sublimed films
S F Yoon, K H Tan, Q Zhang, M Rusli, J Ahn and L Valeri	29	Effect of microwave power on the electron energy in an electron cyclotron resonance plasma
R Kim, Y Kim and J-W Park	37	Influence of densification of the protective layer on the discharge voltage in AC plasma display panel
M A Afifi, M M Abdel-Aziz, H H Labib, M Fadel and E G El-Metwally	45	Electrical and switching properties of amorphous films based on the Ge–Se–Tl system
X T Yang, J H Zhang, X J Zhang, H M Wu, Z W Niu, S J Hou, J Meng and W Jacoby	55	The ultra-high vacuum system of HIRFL-CSR
P J Kelly, R D Arnell, M D Hudson, A E J Wilson and G Jones	61	Enhanced mechanical seal performance through CVD diamond films
A A S Akl, A Ashour, A A Ramadan and K Abd El-Hady	75	Structural study of flash evaporated $CuInSe_2$ thin films
	85	BOOK REVIEWS
	I	ANNOUNCEMENT
	III	VACUUM DIARY

Volume 61 Numbers 2–4

SPECIAL ISSUE

Proceedings of the 8th Joint Vacuum Conference of Croatia, Austria, Slovenia and Hungary (JVC-8)

4–9 June 2000, Pula, Croatia

AUTHORS		ARTICLES
	ix	Editorial
R Brako and D Šokčević	89	Interaction of CO molecules adsorbed on metal surfaces

PII: S0042-207X(01)00356-6

E V Chulkov, M Machado and V M Silkin	95	Inverse lifetime of the surface and image states on Au(111)
Z Lenac	101	Polarization vectors in a 2D Wigner crystal
G Gergely, M Menyhard, Zs Benedek, A Sulyok, L Kover, J Toth, D Varga, Z Berenyi and K Tokesi	107	Recoil broadening of the elastic peak in electron spectroscopy
M Beutl and J Lesnik	113	The influence of subsurface vanadium on the adsorption of hydrogen and carbon monoxide on Pd(1 1 1)
Z Hlavathy and P Tétényi	119	Uptake of C_6 cyclic hydrocarbons on Pt
V S Ovechko, A M Dmytruk, O V Fursenko and T P Lepeshkina	123	Ellipsometry and spectroscopy of porous glass surfaces
K Veltruská, N Tsud, V Brinzari, G Korotchenkov and V Matolín	129	CO adsorption on Pd clusters deposited on pyrolytically prepared SnO_2 studied by XPS
F Šutara, N Tsud, K Veltruská and V Matolín	135	XPS and ESD study of carbon and oxygen chemistry on TiZrV NEG
E C Viljoen, W A Jordaan and J du Plessis	141	On the determination of ternary segregation parameters
B-G Liu and E Schöll	145	Strained growth in surfactant-mediated heteroepitaxy
M Godec, M Jenko, R Mast and H Jürgen Grabke	151	Texture measurements on electrical steels alloyed with tin
D Mandrino and M Jenko	157	A study of oxide layers on electrical steels prepared with different thermal treatments
D Luca, A W D van der Gon, V Anita, M W G Ponjee, H H Brongersma and G Popa	163	Surface nitridation processes and non-linear behaviour of the reactive magnetron discharge with titanium target
M Riedel, H Düsterhöft and F Nagel	169	Investigation of tungsten cathodes activated with Ba_2CaWO_6
Y Pauleau	175	Generation and evolution of residual stresses in physical vapour-deposited thin films
C Eisenmenger-Sittner	183	Condensation and structure of multiphase thin films
A Borghesi, D Besana and A Sassella	193	Epitaxial growth of quaterthiophene thin films by organic molecular beam deposition
S Simeonov, I Yourukov, E Kafedjiiska and A Szekeres	199	RF hydrogen-plasma-related defects in thin SiO_2/p-Si structures
A Szekeres, S Alexandrova, M Modreanu, P Cosmin and M Gartner	205	Optical and electrical properties of LPCVD silicon oxynitride films on silicon
C Riccardi, R Barni, E Sindoni, M Fontanesi and P Tosi	211	Gaseous precursors of diamond-like carbon films: chemical composition of CH_4/Ar plasmas
K Mašek and V Matolín	217	RHEED study of Nb thin film growth on Cu(1 1 1) and (1 0 0) single-crystals
M Malý, R Hrach and D Novotný	223	Neural network approach in image analysis of complex systems
R Ivanic, V Rehacek, I Novotny, V Breternitz, L Spiess, Ch Knedlik and V Tvarozek	229	Sputtered yttrium oxide thin films appropriate for electro-chemical sensors
M Čekada and P Panjan	235	Evaluation of microhardness and elastic properties of multilayer hard coatings by microindentation
P Panjan, P Cvahte, M Čekada, B Navinšek and I Urankar	241	PVD CrN coating for protection of extrusion dies
M Serényi, M Rácz and T Lohner	245	Refractive index of sputtered silicon oxynitride layers for anti-reflection coating

M Adamik, P B Barna and I Tomov	251	Texture and grain structure in polycrystalline silver films deposited by partially ionised beam
D Grozdanić, O Milat, B Rakvin, B Pivac,A Slaoui and R Monna	257	Grain boundary defects in RTCVD polycrystalline silicon for solar cells
A Szekeres, A Paneva and S Alexandrova	263	Study of thin SiO_2 and its interface formed by thermal oxidation of rf hydrogen plasma-cleaned silicon
L Zajíčková, K Veltruská, N Tsud and D Franta	269	XPS and ellipsometric study of DLC/silicon interface
R Bene, Z Pintér, I V Perczel, M Fleischer and F Réti	275	High-temperature semiconductor gas sensors
D Franta, L Zajíčková, I Ohlídal and J Janča	279	Optical characterization of diamond-like carbon films
I Ohlídal, D Franta, M Ohlídal and K. Navrátil	285	Determination of thicknesses and spectral dependences of refractive indices of non-absorbing and weakly absorbing thin films using the wavelengths related to extrema in spectral reflectances
A Zalar, J Jagielski, M Mozetič, B Praček and P Panjan	291	Ion beam mixing of Ni/Al multilayer structure at different temperatures
A Csik, D L Beke, G A Langer, Z Erdelyi, L Daróczi, K Kapta and M Kis-Varga	297	Non-linearity of diffusion in amorphous Si–Ge multilayers
D Gracin, I Bogdanović, V Borjanović, M Jakšić, Ž Pastuović, J M Dutta, B Vlahović and R J Nemanich	303	Quantitative analysis of a-$Si_{1-x}C_x$:H thin films by vibrational spectroscopy and nuclear methods
M Stubičar, A Tonejc and N Radić	309	Microhardness characterization of Al–W thin films
A Berkó, T Bíró, T Kecskés and F Solymosi	317	Self-organization of oxide nanodots generated by low energy Ar^+ bombardment on $TiO_2(1\,1\,0)$-(1×2)
T Lalinský, J Škriniarová, J Kuzmík, S Hasenöhrl, A Fox, M Tomáška, Ž Mozolová, T Kovačik, A Krajcer and P Kordoš	323	Technology and performance of 150 nm gate length InGaP/InGaAs/GaAs pHEMTs
T Lalinský, J Škriniarová, I Kostič, A Hart van der, P Hrkút, Š Haščík, L Matay, Ž Mozolová and P Kordoš	329	T-shaped gates for heterostructure field effect transistors
J Kuzmík, S Hasenöhrl, R Kúdela, Š Haščík, Ž Mozolová, T Lalinský, P Vogrinčič, J Breza, J Škriniarová, A Fox and P Kordoš	333	InGaAs/InGaP HEMTs: technological optimization and analytical modelling
V M Samsonov, S D Muravyev and V V Dronnikov	339	Computer simulation of evolution of nanometric microparticles in the field of the solid–vacuum interface
A Bilušić, D Pavuna and A Smontara	345	Figure of merit of quasicrystals: the case of Al–Cu–Fe
D Korošak and B Cvikl	349	The microscopic model of Fermi level pinning in ionized cluster beam deposited Ag/n-Si Schottky structures
B Cvikl and D Korošak	355	The effective density of induced interface states of ionized cluster beam deposited Ag/n-Si Schottky junctions
U V Desnica and I D Desnica-Frankovic	361	Common origin of doping-limiting mechanisms in IIB–VI compounds and alloys
M Mozetič	367	Discharge cleaning with hydrogen plasma
A Vesel and M Mozetič	373	Behaviour of catalytic probe during surface activation of polyether sulphone
C Kugler, F Bauer, J Laimer and H Störi	379	Is there a way to improve the uniformity of TiN deposition conditions in large pulsed d.c. plasma CVD reactors?

Ž Andreić, D Gracin, L Aschke and H-J Kunze	385	The visibility of UV and visible lines of highly ionized carbon in spectra of laser-produced plasmas
Cs Szabó, S Biri, L Kenéz, T Suta and A Valek	391	Diagnostic research of highly ionized plasma generated by an ECR ion source
B Szikora	397	Bohm criterion in magnetron plasma
A-M Diamy, R Hrach, V Hrachová and J-C Legrand	403	Influence of C atom concentration for acetylene production in a CH_4/N_2 afterglow
V Monna and A Ricard	409	Emission spectroscopy of $Ar–H_2$ plasma
G Misslinger, J Laimer and H Störi	413	Investigation of the plasma chemistry relevant for diamond deposition with chlorinated hydrocarbons
P Bárczy	419	Universal multizone crystallizator (UMC)—novel challenges and results
P Petrik and C Schneider	427	In situ spectroscopic ellipsometry in vertical furnace: monitoring and control of high-temperature processes
J Laimer, G Misslinger and H Störi	435	Mass spectrometry with a time resolution of a few milliseconds using a helium flushed probe system
I Futo, M Molnar, L Palcsu, E Svingor and Zs Szanto	441	Application of a noble gas mass spectrometric system in environmental studies
B Zajec and V Nemanič	447	Hydrogen bulk states in stainless-steel related to hydrogen release kinetics and associated redistribution phenomena
D Kek and N Bonanos	453	Investigation of hydrogen oxidation reaction on a metal/perovskite proton conductor interface by impedance spectroscopy
G Hars	459	The concept of the helical dipole conduit and its applications
V Nemanič, M Žumer and B Zajec	465	Pressure determination in small electron tubes
B Šuštaršič, L Kosec, M Jenko and V Leskovšek	471	Vacuum sintering of water-atomised HSS powders with MoS_2 additions
I Galesic, U Reusch, C Angelkort, H Lewalter, A Berendes, E Schweda and B O Kolbesen	479	Nitridation of vanadium in molecular nitrogen: a comparison of rapid thermal processing (RTP) and conventional furnace annealing
